## Instructions for Taking Hair Samples for DNA Testing

<http://www.ca.uky.edu/gluck/images/info%20pages/EPTL/Instructions%20for%20collecting%20DNA%20samples.pdf>

- Pull 30-50 hairs from the mane or tail (5-10 hairs at a time).
- Make sure there are some pulled hairs with a bulb or follicle at the end. (This is where we obtain the DNA.)

- Do not use shedded hairs. (from brush, etc.)
- Align the bulb ends of the pulled hairs together and trim end without bulb to 3-4 inches.
- Tape hair on paperwork where indicated.
- Place in standard envelope.
- Put envelope and appropriate paperwork in First Class Mail or Express, if desired.

Send hair sample to the ASAV Registrar including the following information:

- Name of the horse (include sire & dam information)
- ASAV or other registration number if exists
- Include a check over **\$33** made out to ASAV: American-Shagya-Arabian-Verband.
- Please use one envelope for each horse/DNA-Testing.

If you have further questions – please contact the ASAV Registrar.

**ASAV-Registrar: Daunna Sellers**

ASAV - American Shagya Arabian Verband  
15918 Porter Road  
Verona, KY 41092, USA
